There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For great many doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Son, Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. **Climate and Crop Bulletin**

Of the Weather Bureau, Missouri Section, U. S. Department of Agriculture, for the Week Ending July 29, 1901.

The week just closed has been the sixth week of extreme heat, and the warmest of the season, the temperature averaging 8 to 13 degrees above the normal. Maximum temperatures of 100 degrees and above occurred in all sections on the first four days of the week, the highest reported being 116 degrees, at Marble Hill on the 22nd, but toward the close of the week the weather became much cooler. Local showers have fallen in nearly all sections of the state and still continue at this writing. Up to Saturday evening, when the majority of correspondents' reports were mailed, there had not been sufficient rain to materially benefit growing crops, except in a few of the central and western counties, where the total fall ranged from 1 to 1 1/2 inches, but later reports received from a few points indicate that good rains fell over a considerable portion of the state on the 28th and 29th.

From one half to nine tenths of the corn crop is reported to be so far gone that even with the most favorable conditions in the future it can make nothing but fodder, while the remainder, with abundant rains, may make one-tenth to one-half an average yield. Apples still promise a fair crop, with favorable weather, in a few of the western and southern counties, but in general the crop will be very light. Peaches are, on the whole, rather more promising than apples, but are generally small and have wilted and dropped badly.

The roof on the old sawmill shed near Winkler & Lupkes' mill in Gordonville caught fire Monday, and it was with great difficulty that the fire was extinguished. This little happening causes the boys to make haste and put an iron roof on the building. Something like this would bestir our people to erect waterworks in Jackson. Should fire break out in our town we would have no means of putting it out.

The thermometer for July showed that fifteen days of the month was 100 and over. This is something that has never happened before in this country.
